Appropriate for: Registered Nurses

(NB: Staff applying for this training should bring along a McKinley T34 Syringe Driver from their organisation to the training session)

The nurse needs to identify a qualified mentor who is competent in McKinley Syringe Drivers and who is able to assess and sign off competencies within 2 months of attendance of the training (NMC Code 2008)

Max Number: 10

Key KSF Dimensions covered: C1, C2, C3, HWB2, HWB5, HWB7

Facilitators: Phyllis Tuckwell Community Specialist Palliative Care team

Cost: £40 per person

Aims:

- To increase awareness of the safe management of the McKinley T34 Syringe Driver in palliative care in the community setting.
- Demonstrate use of the Syringe Driver to help facilitate confidence in practice.

Learning Outcomes:

- Outline relevant clinical guidelines associated with use of syringe drivers.
- Identify the risks and benefits involved with the use of a syringe driver.
- Gain an awareness of medication compatibility and conversions associated with oral to subcutaneous administration.
- Demonstrate safe use of the Syringe Driver and have an opportunity to practise.

Booking process:

Please ensure payment is made prior to commencement of the course. To reserve your place complete and return the attached booking form. For information regarding all courses held at the Hospice and the Beacon Centre, please look on our website at **www.pth.org.uk**
